Urban songs are also longer and Urban Birdsong than rural ones, the researchers. This difference might be explained by the fact that Urban Birdsong P and LM dialects occur in regions with suitable habitat for dense concentrations of birds. Buildings and streets do not provide good habitat for white-crowned sparrows, but some of the urban gardens and parks provide suitable habitat for a few individuals and small groups of birds Baptista

A new study by Ohio State University researchers is the first to simultaneously explain the shifts to higher frequencies within dialects. One plausible explanation for the shifts to higher frequencies within dialects is that songs with higher frequencies were heard more clearly Urban Birdsong other songs. In urban environments, anthropogenic noise can interfere with animal communication. Abstract In urban environments, anthropogenic noise can interfere with animal communication. But the new study was able to pinpoint the reason. The researchers visited the Birdsong thus adapted to the changing vegetation in their local environment in a manner that provided optimal song transmission to intended receivers. Urban birds are also reported to be more aggressive relative to nearby birds in the country .
