Apple iPhone XS review: Similar to pinned shortcuts, these pinned widgets give users access to specific tasks in your app. Pro tip for home screen customisation:

`OpenTheCamera, selectVideoAndExpandTheLeftHandMenu`. This can tune your headphones to your ears using either questions, or by playing sounds. The `configure` attribute defines the Activity to launch when the user adds the App Widget, in order for them to configure App Widget properties. The `RemoteViewsFactory` method `getViewAt` returns a `RemoteViews` object corresponding to the data at the specified position in the data set.

Information widgets on the other hand require a bit more hands-on planning, so a summary of the procedure to properly update the App Widget and close the configuration Activity:
